

**EMResource is a secure, online platform used as an information sharing and patient surge data collection tool by the Chicago Department of Public Health (CDPH), the Regional Hospital Coordination Center (RHCC), and select healthcare facilities (hospitals, long-term care facilities, and dialysis centers).**

**EMResource serves as the hospital bed availability bed reporting system for the State of Illinois and the hospital bypass/diversion reporting system for Region 11 (Chicago). It is used to assess and monitor resource capabilities of select healthcare facilities during large events and unplanned emergencies.**
