Update Resource Statuses

Overview

A resource is an entity that reports a status. These can be facilities, organizations, and agencies that report information on medical capabilities, services, supplies, and much more. A sub-resource is subordinate to a resource, and it also reports a status. A sub-resource to a facility could be a generator or contact.

Columbia Hospital	Closed	Unavailable
St. Mary's Ozaukee	Closed	Available
Memorial Hospital	Resource Limitations	--
Memorial Lutheran Hospital	Resource Limitations	Available
Sinai Samaritan Medical Center	Open	Available

When a change occurs at your location, you or another authorized individual should update your resource's status in EMResource. This ensures other users at your location and in your region have the most up-to-date resource information.
